Description of Position: Java Developer

Experienced developer with experience spanning at least 8 years in IT with actual hands-on experience in all the phases of Software Development Life Cycle. Apply technical expertise / capabilities and Java development skills to design and develop efficient software solutions, based upon client's business requirements.

Job Requirements:

1. Analyze customer requirements.
2. Perform all programming functions to accomplish specific software solution requirements.
3. Design (or modify) systems to accomplish functions in compliance with the Software Development Life Cycle framework.
4. Verify the accuracy and validity of all software developed, including preparations of sample test data and the execution of program, job stream, and system testing.
5. Prepare all required documentation indicating system functionality.
6. Improve and upgrade software components based on new and changing requirements.
7. Participate in the design process as part of the application development team.
8. Work with multiple teams on component integration, testing and deployment.
9. Keep abreast of current and emerging software development and deployment products and tools.

Required Skills:

1. Experience as software developer or applicable certifications - 8 Years.
2. Object Oriented Design and Development experience - 5 Years.
3. Java experience and knowledge of various Java packages and IDEs - 5 Years.
4. Experience in web design using server side Java technologies - 5 Years.
5. Experience with UML - 5 Years.
6. Experience working with different databases, like Oracle and SQL Server - 5 Years.
7. Experience in J2EE, EJB, middleware, application servers - 5 Years.
8. XML, related protocols (including SOAP), XML-handling packages and tools - 3 Years.
9. Designing and implementing large-scale applications based on Java/XML tech - 3 Years.
10. Experience in profiling and performance tuning of Java applications - 3 Years.
11. Projects involving collecting and analyzing data from multiple systems - 1 Years.
12. Experience Health care industry IT projects - 1 Years.
13. Experience using the Rational Unified Process (RUP) - 1 Years.
