Description of Position: .NET Developer

The Developer will be required to participate in all phases of the System Development Life Cycle (SDLC) as part of our Web Development Team. As a Developer, the candidate must be able to interact with clients and stakeholders to understand business requirements and effectively communicate the proposed IT solutions. The candidate will also need to be able to work with the analysis team to analyze appropriate web application solutions and develop the proposed IT solutions based on the requirements.

The candidate will work with SQL Server to write SQL scripts, update, and maintain database tables as needed. Other duties include the ongoing maintenance of the internal and external Web sites, the development, as well as, integration, enhancement and maintenance of enterprise applications for delivery over the web. Candidate will work in the team to design, develop, and implement web applications and create standardized technical documentation.

Required Skills:

1. Participate in all phases of SDLC including requirements gathering, analysis, design, development, testing, and deployment.
2. Over 8 years of experience in Web Development.
3. ASP.NET programming with C#.
4. Develop Web applications using Visual Studio 2008 and .NET 2.0/3.0/3.5/4/4.5 or later.
5. Hands-on experience in JavaScript programming.
6. Experience with SQL Server 2000/2005 or later.
7. Experience with XSLT, XML, Cascading Style Sheets (CSS).
8. Excellent oral and written communication skills.
